To Whom It May Concern:

This letter is a recommendation for Daniel Brown. Daniel is a senior Ruby on Rails developer on our team at QuickWaters Software. I have found Dan to always be dedicated, knowledgeable, thorough and hard working.

Besides being easy to work with, Dan is a self-starter who is able to take challenging problems and provide simple and elegant solutions. In addition, he is able to present those ideas and communicate the benefits. Dan was instrumental in building the data management component of our software package, which he did efficiently and delivered on-time and within budget.

In addition to being able to deliver on his own, Daniel is a team player. He works well with others on our team, presenting ideas for improvement, mentoring and just generally being available as a sounding board.

I highly recommend Daniel for any engagement. He would make a great addition to any team or organization.

Sincerely,

A handwritten signature in blue ink, appearing to read 'JMH', written over a light blue circular watermark.

Jack M. Hunt Jr.  
COO  
QuickWaters Software LLC

## REUTERS INSIGHT

March 10, 2009

To Whom It May Concern:

I am pleased to write this letter of recommendation for Daniel Brown. Daniel is a seasoned Ruby on Rails developer and directly reported to me (Director of Development) while we both worked at Thomson Reuters. I was initially impressed with Daniel's enthusiasm, professional demeanor and his ability to take a complex problem and turn it into simple workable solution that consistently exceeded business expectation.

Daniel is reliable, dedicated and delivery oriented. He was actively involved in each of the development stages throughout the project - from requirement analysis, architecture and implementation to successful production deployment and troubleshooting. Daniel's ability to use his knowledge to take on and resolve new challenges has made him a go-to person and a valuable asset to the team.

Of particular value to me as his former manager, were Daniel's team-player mindset, flexibility for changing business requirements, ability to work with minimal supervision and his relentless commitment to deliver timely and high quality software.

I highly recommend Daniel and sincerely believe he will make a great positive impact on any organization or group he decides to join. Please feel free to contact me if you require any additional information.

Yours truly,

Mo Attia  
Director of Development, Reuters Insight
